

- Final International Conference -

In the era of the 4th industrial revolution and digitalization, new perspectives are opened and various challenges appear for small and medium-sized enterprises – who need to embrace novel technologies, principles, and approaches. How to overcome these digital transformation challenges and be ready for new opportunities?

02. March 2022

09:00 - 15:00 CET

Zoom

Our CHAIN REACTIONS event aims to highlight the results of the analysis of industrial sectors and their value chains. At the same time, we aim to accelerate real dialogues with the invitation of various actors presenting implemented pilot actions from partner countries and EU policies for innovation. We create a live platform for discussions between Advanced Manufacturing, Bioeconomy, Energy and Environment, Health, ICT, and electronics sectors.
