
Zieleń i natura jako źródło dobrostanu. Warsztaty w ramach projektu Picobello Interreg Europa

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.1 billion, from 1.1 billion in 1980 to 2.2 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. In 1980, the average woman in the world had 2.5 children. In 1999, the average woman in the world had 2.7 children.

Another reason why the world population is growing so rapidly is that the number of people who are surviving to old age has increased. In 1980, the average person in the world lived for 55 years. In 1999, the average person in the world lived for 65 years.

There are a number of reasons why the number of people who are surviving to old age has increased. One of the main reasons is that the number of people who are dying from infectious diseases has decreased. In 1980, 1.5 billion people in the world died from infectious diseases. In 1999, 0.5 billion people in the world died from infectious diseases.

Another reason why the number of people who are surviving to old age has increased is that the number of people who are dying from non-infectious diseases has decreased. In 1980, 0.5 billion people in the world died from non-infectious diseases. In 1999, 0.2 billion people in the world died from non-infectious diseases.

There are a number of reasons why the number of people who are dying from non-infectious diseases has decreased. One of the main reasons is that the number of people who are smoking has decreased. In 1980, 1.5 billion people in the world smoked. In 1999, 0.5 billion people in the world smoked.

Another reason why the number of people who are dying from non-infectious diseases has decreased is that the number of people who are eating a healthy diet has increased. In 1980, 0.5 billion people in the world ate a healthy diet. In 1999, 1.5 billion people in the world ate a healthy diet.

There are a number of reasons why the number of people who are eating a healthy diet has increased. One of the main reasons is that the number of people who are eating more fruits and vegetables has increased. In 1980, 0.5 billion people in the world ate more fruits and vegetables. In 1999, 1.5 billion people in the world ate more fruits and vegetables.

Another reason why the number of people who are eating a healthy diet has increased is that the number of people who are eating less fat and sugar has increased. In 1980, 0.5 billion people in the world ate less fat and sugar. In 1999, 1.5 billion people in the world ate less fat and sugar.

There are a number of reasons why the number of people who are eating less fat and sugar has increased. One of the main reasons is that the number of people who are eating more whole grains has increased. In 1980, 0.5 billion people in the world ate more whole grains. In 1999, 1.5 billion people in the world ate more whole grains.

Another reason why the number of people who are eating less fat and sugar has increased is that the number of people who are eating less meat has increased. In 1980, 0.5 billion people in the world ate less meat. In 1999, 1.5 billion people in the world ate less meat.

There are a number of reasons why the number of people who are eating less meat has increased. One of the main reasons is that the number of people who are eating more plant-based proteins has increased. In 1980, 0.5 billion people in the world ate more plant-based proteins. In 1999, 1.5 billion people in the world ate more plant-based proteins.

Zieleń jako czynnik dobrostanu

Wyzwania: niewidoczny potencjał i brak koordynacji

Propozycje działań i rekomendacje

Śląskie w duchu Nowego Europejskiego Bauhausu
